LS Power Grid New York Corporation I
Workpaper - Cost Cap, Cost Containment, and Risk Sharing

Segment A Project Cost Cap, Cost Containment, and Risk Sharing Calculations

In Section IV, yellow shaded cells have been populated to calculate Project Costs in Section I. The Cost Cap in Section II and the the Adjusted Cost Cap in Section III are populated from Section IV, Lines 3 and 5, respectively. Any necessary adjustments to Attachment 4 in the formula rate template would be calculated in Sections II and III. As indicated, the sections do not apply because Project Costs do not exceed the Cost Cap and Project Costs are not below the Adjusted Cost Cap.

I Calculation of LSPGNY Segment A Project Costs

1	Total Segment A Capital	$450,559,296	
2	plus: Portion of National Grid Costs	$9,171,383	
3	less: Third Party Costs	$91,194,900	
4	less: Project Development Costs	$1,627,956	
5	less: Other Project Capitalized Costs	$24,996,406	
6	less: Unforeseeable Costs greater than five percent of Cost Cap	$0	
7	**Project Costs**	**$341,911,417**	Sum (Lines 1:2) - Sum (Lines 2:6)

II Cost Containment Mechanism For Prudently Incurred Actual Project Costs Above Cost Cap

1	**Cost Cap**	**$350,616,575**	Section IV, Line 3	
2	**Project Costs**	**$341,911,417**	Section I, Line 7	
3	**Cost Cap minus Project Costs**	**-$8,705,158**	→ → →	**Project Costs do not exceed Cost Cap; this section does not apply.**
4	Project Costs above Cost Cap	$0		calculation: [-MIN (0 , (Cost Cap - Project Costs)]
5	Project Costs above Cost Cap x 20%	$0		§3.6 Settlement Agreement, item 1a These costs will not earn any ROE, but recover the associated depreciation and debt cost. This vaue subject to *negative* 10.65% ROE 'adder' on Attachment 4, Line 66_
6	Project Costs above Cost Cap x 80%	$0		§3.6 Settlement Agreement, item 1b These costs will not earn any ROE Incentive Adders on the equity portion of such costs, but earn the Base ROE, associated depreciation, and debt cost. This value subject to *negative* 1.00% ROE 'adder' on Attachment 4, Line 66_

III Additional ROE Adder for Actual Project Costs Below the Adjusted Cost Cap

1	**Adjusted Cost Cap**	**$295,116,575**	Section IV, Line 5	
	Project Costs	**$341,911,417**	Section I, Line 7	
	Adjusted Cost Cap minus Project Costs	**$46,794,842**	→ → →	**Project Costs are not below the Adjusted Cost Cap; this section does not apply.**
2	Project Costs below Adjusted Cost Cap	$0		calculation: [MAX (0 , (Adjusted Cost Cap - Project Costs)]
3	0% to <=5% below Adjusted Cost Cap	$0		§3.6 Settlement Agreement, item 3, Table A: This value subject to 5 bps incentive ROE adder on Attachment 4, Line 66_
4	5% to <=10% below Adjusted Cost Cap	$0		§3.6 Settlement Agreement, item 3, Table A: This value subject to 17 bps incentive ROE adder on Attachment 4, Line 66_
5	10% to <=15% below Adjusted Cost Cap	$0		§3.6 Settlement Agreement, item 3, Table A: This value subject to 30 bps incentive ROE adder on Attachment 4, Line 66_
6	15% to <=20% below Adjusted Cost Cap	$0		§3.6 Settlement Agreement, item 3, Table A: This value subject to 45 bps incentive ROE adder on Attachment 4, Line 66_
7	20% to <=25% below Adjusted Cost Cap	$0		§3.6 Settlement Agreement, item 3, Table A: This value subject to 62 bps incentive ROE adder on Attachment 4, Line 66_
8	>25% below Adjusted Cost Cap	$0		§3.6 Settlement Agreement, item 3, Table A: This value subject to 71 bps incentive ROE adder on Attachment 4, Line 66_

IV Input Data and Calculated Input Values

	Item		Value		Description
1	Total Segment A Capital		$450,559,296	June 11, 2024 WP + 1.25 mil. trailing costs	All capital costs incurred to develop, construct, and place the Segment A Project in service
2	AFUDC		$34,116,575	June 11, 2024 WP	Segment A Allowance for Funds Used During Construction (AFUDC)
3	**Cost Cap**		$350,616,575		§3.6 Settlement Agreement calculation: [316,500,000 + AFUDC]
4	Five Percent of Cost Cap		$17,530,829		calculation: [Cost Cap x 0.05]
5	**Adjusted Cost Cap**		$295,116,575		§3.6 Settlement Agreement, item 2b calculation: [$261,000,000 + AFUDC]
6	Bin 0%-5%		$14,755,829		§3.6 Settlement Agreement, item 3, Table A: 0% to <=5% below Adjusted Cost Cap
7	Bin 5%-10%		$29,511,657		§3.6 Settlement Agreement, item 3, Table A: 5% to <=10% below Adjusted Cost Cap
8	Bin 10%-15%		$44,267,486		§3.6 Settlement Agreement, item 3, Table A: 10% to <=15% below Adjusted Cost Cap
9	Bin 15%-20%		$59,023,315		§3.6 Settlement Agreement, item 3, Table A: 15% to <=20% below Adjusted Cost Cap
10	Bin 20%-25%; 25%+		$73,779,144		§3.6 Settlement Agreement, item 3, Table A: 20% to <=25%; >25% below Adjusted Cost Cap
11	**Project Costs**		$341,911,417		§3.1 Settlement Agreement, item 5 All capital costs incurred to develop, construct, and place the Segment A Project in service excluding Third Party Costs, Project Development Costs, Other Project Capitalized Costs, and Unforeseeable Costs in excess of 5% of the Cost Cap
12	Portion of National Grid Settlement		$9,171,383	June 11, 2024 WP	These costs adjusted for the portion of the Segment A Project that is funded and recovered by National Grid as described in the settlement agreement in FERC Docket No. ER24-67.
13	Third Party Costs		$91,194,900	June 11, 2024 WP	§3.1 Settlement Agreement, item 4: Costs that result from: (i) NYISO modifications or further NYISO requirements, including interconnection costs and upgrades; or (ii) payments to an incumbent Transmission Owner including real estate-related costs incurred in any lease arrangements, purchases related to the acquisition of rights-of-way or access to rights-of-way, purchases of rights to access utility facilities and payments for assets to be retired; (iii) increased costs, such as costs incurred related to the rescheduling of outages or the relocation of utility assets, due to an action or inaction by the incumbent transmission owner and that are beyond the ability of LSPGNY to control or mitigate or (iv) all sales and property taxes. Third Party Costs are recoverable in the formula rate and includable in FERC Account 107 during construction and the appropriate account after being placed in service.
14	Project Development Costs		$1,627,956	June 11, 2024 WP	§3.1 Settlement Agreement, item 6: Costs incurred for the Segment A Project prior to the selection of one or more transmission developer(s) by the NYISO Board of Directors, are not included in the Capital Cost Bid submitted to the NYISO, are not subject to the Cost Cap defined below, and are recoverable in the formula rate.
15	Other Project Capital Costs		$24,996,406	June 11, 2024 WP	§3.1 Settlement Agreement, item 3: Capitalized costs incurred other than to develop, construct, and place the Segment A Project in service, such as capitalized spare parts.
16	Unforeseeable Costs		$541,378	June 11, 2024 WP	§3.1 Settlement Agreement, item 7: Costs and savings that, with the exercise of commercially reasonable due diligence, could not have been anticipated at the time the Capital Cost Bid for the Segment A Project was submitted to the NYISO on April 29, 2016. Specific definitions in Settlement Agreement.
17	Unforeseeable Costs greater than five percent of Cost Cap		$0		calculation: [MAX (0 , (Unforeseeable Costs - Five Percent of Cost cap))

Rate Formula Template
Utilizing FERC Form 1 Data

For the 12 months ended 12/31/2027

LS Power Grid New York Corporation I

General Note: References to pages in this formulary rate are indicated as: (page#, line#, col.#)
References to data from FERC Form 1 are indicated as: #.y.x (page, line, column)

Note Letter	
A	Balances exclude Asset Retirement Costs.
B	No Acquisition Adjustment will be recovered until a filing requesting recovery is submitted to and approved by FERC under FPA Section 205.
C	The balances in Accounts 190, 281, 282 and 283 are allocated to transmission plant included in ISO rates based on company accounting records. Accumulated deferred income tax amounts associated with asset or liability accounts excluded from rate base do not affect rate base, such as ADIT related to asset retirement obligations and certain tax-related regulatory assets or liabilities. To the extent that the normalization requirements apply to ADIT activity in the projected net revenue requirement calculation or the true-up adjustment calculation, the ADIT amounts are computed in accordance with the proration formula of Treasury regulation Section 1.167(l)-1(h)(6) with averaging in accordance with IRC Section 168(i)(9)(B). The remaining ADIT activity are averaged. Work papers supporting the ADIT calculations will be posted with each projected net revenue requirement and/or Annual True-Up and included in the annual Informational Filing submitted to the Commission.
D	Investment tax credit (ITC) is recorded in accordance with the deferral method of accounting and any normalization requirements that relate to the eligibility to claim the credit or the recapture of the credit. The revenue requirement impact of any ITC amortization permitted to reduce income tax expense is determined as the amount of the Amortized Investment Tax Credit (266.8.f) multiplied by the applicable tax gross-up factor.
E	The composite income tax rate (T) applicable to each Rate Year (including both Annual Projections and True-Up Adjustments) is based on the Federal income tax rate (FIT), the State income tax rate (SIT) and the percentage of federal income tax deductible for state income tax purposes (P). If the utility is taxed in more than one state, it must attach a work paper showing the name of each state and how the blended or composite SIT was computed.

Inputs Required:

Federal income tax rate (FIT) =	21.00%	
Composite state income tax rate (SIT) =	7.25%	(Attachment 3)
Percent of federal income tax deductible for state purposes (P) =	0.00%	

	For each Rate Year (including both Annual Projections and True-Up Adjustments) the statutory income tax rates utilized in the Formula Rate shall reflect the weighted average rates actually in effect during the Rate Year. For example, if the statutory tax rate is 10% from January 1 through June 30, and 5% from July 1 through December 31, such rates would be weighted 181/365 and 184/365, respectively, for a non-leap year.
F	Upon enactment of changes in tax law, ADIT balances are re-measured and adjusted in the Company's books of account, resulting in excess or deficient accumulated deferred income tax assets and liabilities. Such excess or deficient ADIT attributable to assets or liabilities reflected in ISO rates and subsequent recoverable or refundable amortization will be based upon tax records and be calculated and recorded in accordance with ASC 740 and any applicable normalization requirements of the taxing jurisdiction. For each re-measurement of deferred taxes, the amounts entered as Adjustments to Rate Base or a component of Income Taxes will be supported by work papers providing the balance for each taxing jurisdiction at the beginning and end of the year, amortization for the year and any other information required to support compliance with any applicable normalization requirements.
G	In the event that transmission assets or right of ways involve a lumpsum upfront payment under a lease that qualifies as a capital lease, it will be amortized over the life of the lease to Account 567 and the unamortized balance will be included here. In the event such a lease involves monthly or annual payments, the payments will be booked to Account 567.
H	Unfunded Reserves are customer contributed capital authorized by a regulatory agency. Balances, if any, will be supported by a workpaper. No amounts shall be credited to accounts 228.1 through 228.4 unless authorized by a regulatory authority or authorities to be collected in a utility's rates.
I	Recovery of Regulatory Assets must be authorized by the Commission.
J	Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of Abandoned Plant.
K	Cash Working Capital assigned to transmission is transmission-allocated O&M minus the amortization of any Regulatory Asset, divided by eight. Prepayments are the electric related prepayments booked to Account No. 165 and reported on Pages 110-111 line 57 in the Form 1.
L	Line 45 removes EPRI Annual Membership Dues listed in Form 1 at 353.f, any EPRI Lobbying expenses included in line 42 of the template and all Regulatory Commission Expenses itemized at 351.h. Line 45 removes all advertising included in Account 930.1, except safety, education or out-reach related advertising. Line 45 removes all EEI and EPRI research, development and demonstration expenses. Line 46 reflects all Regulatory Commission Expenses directly related to transmission service, ISO filings, or transmission siting itemized at 351.h Line 42 or Line 44 and thus Line 48 shall include any NYISO charges other than penalties, including but not limited to administrative costs.
M	Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year.
N	Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.
O	In accordance with the Settlement Agreement in Docket No. ER 20-716 approved June 17, 2021, the Base Return on Equity shall be 9.65% and no change in ROE may be made absent a filing with FERC under FPA Section 205 or 206.
P	A hypothetical capital structure of 47% debt and 53% equity will be used until the entire Marcy to New Scotland 345 kV Upgrade Project is placed in-service. After all facilities of the Marcy to New Scotland 345 kV Upgrade Project are placed in- service, the lesser of a 52% equity ratio or the actual equity ratio will be used.
Q	Non-incentive investments are investments without ROE incentives and incentive investments are investments with ROE incentives

Attachment 1 - Revenue Credit Workpaper*
LS Power Grid New York Corporation I

	Account 454 - Rent from Electric Property (300.19.b)	Notes 1 & 3	
1	Rent from FERC Form No. 1		218,957
	Account 456 (including 456.1) (300.21.b and 300.22.b)	Notes 1 & 3	
2	Other Electric Revenues (Note 2)		-
3	Professional Services		-
4	Revenues from Directly Assigned Transmission Facility Charges (Note 2)		-
5	Rent or Attachment Fees associated with Transmission Facilities		-
6	Total Revenue Credits	Sum lines 2-5 + line 1	218,957

Note 1 All revenues booked to Account 454 that are derived from cost items classified as transmission-related will be included as a revenue credit. All revenues booked to Account 456 (includes 456.1) that are derived from cost items classified as transmission-related, and are not derived from rates under this transmission formula rate will be included as a revenue credit. Work papers will be included to properly classify revenues booked to these accounts to the transmission function. A breakdown of all Account 454 revenues by subaccount will be provided below, and will be used to derive the proper calculation of revenue credits. A breakdown of all Account 456 revenues by subaccount and customer will be provided and tabulated below, and will be used to develop the proper calculation of revenue credits.

Note 2 If the facilities associated with the revenues are not included in the formula, the revenue is shown below, but not included in the total above.

Note 3 All Account 454, 456, and 456.1 Revenues must be itemized below and tie to FERC Form No. 1 cites set forth below.

Line No.		TOTAL	NY-ISO	Other 1	Other 2
1	Accounts 456 and 456.1 (300.21.b plus 300.22.b)

All unfunded reserves will be listed above, specifically including (but not limited to) all subaccounts for FERC Account Nos. 228.1 through 228.4. "Unfunded reserve" is defined as an accrued balance (1) created and increased by debiting an expense which is included in this formula rate (column (e), using the same allocator in column (g) as used in the formula to allocate the amounts in the corresponding expense account) (2) in advance of an anticipated expenditure related to that expense (3) that is not deposited in a restricted account (e.g., set aside in an escrow account, see column (d)) with the earnings thereon retained within that account. Where a given reserve is only partially funded through accruals collected from customers, only the balance funded by customer collections shall serve as a rate base credit, see column (f). The source of monthly balance data is company records.

Notes

A Long Term debt balance will reflect the 13 month average of the balances, of which the 1st and 13th are found on page 112, lines 18.c to 21.c, in the Form No. 1; the cost is calculated by dividing line 222 by the Long Term Debt balance on line 229.

B Preferred Stock balance will reflect the 13 month average of the balances, of which the 1st and 13th are found on page 112 line 3.c in the Form No. 1

C Common Stock balance will reflect the 13 month average of the balances, of which the 1st and 13th are found on Form 1 page 112 line 16.c less lines 3.c , 12.c, and 15.c

D Long-term interest will exclude any short-term interest included in FERC Account 430, Interest on Debt to Associated Companies

LS Power Grid New York Corporation I

Project Worksheet

Attachment 4

For the 12 months ended 12/31/2027

Utilizing Appendix A Data

The calculations below calculate that additional revenue requirement for 100 basis points of ROE and 1 percent change in the equity component of the capital structure.
These amounts are then used to valuate the actual increase in revenue in the table below (starting on line 66) associated with the actual incentive authorized by the Commission
The use of the 100 basis point calculations do not presume any particular incentive (i.e., 100 basis points) being granted by the Commission.

68	Check Sum Appendix A Line 3																76,971,995
69	Difference (must be equal to zero)																-

Note:

A Column (b), Net Investment includes the Net Plant In Service, unamortized regulatory assets, and unamortized abandoned plant.

B Column (l), Gross Plant in Service excludes Regulatory Assets, CWIP, and Abandoned Plant.

C Competitive Bid Concession, if any, will reflect outcome of competitive developer selection process and will be computed on a workpaper that will be provided as supporting documentation for each Annual Update and will be zero or a reduction to the revenue requirement. The amount in Column (p) above equals the amount by which the annual revenue requirement is reduced from the ceiling rate.

D Column (e), for each project with an incentive in column (e), note the docket No. in which FERC granted the incentive>

Project	Docket No.	Note
Marcy to New Scotland 345 kV Upgrade Project (Segment A)	ER20-716	100 basis point ("bp") adder to the Base ROE will apply to Project Costs incurred up to the Cost Cap (defined in Section III. B. 5 of Settlement Agreement). A 100 bp ROE adder shall also apply to Unforeseeable Costs (that are more than five (5) percent of the Cost Cap), Third Party Costs, and Project Development Costs. The 100 bp consists of a 50 bp incentive adder to account for benefits to customers, including congestion relief, and a 50 bp incentive adder for risks and challenges in developing the AC Transmission Projects.

Attachment 5 - Example of True-Up Calculation
LS Power Grid New York Corporation I

					Annual True-Up Calculation		
1	Year 2025						
	A	B	C	D	E	F	G
	Project Identification	Project Name	Actual Adjusted Net Revenue Requirement[1]	Revenue Received[2]	Net Under/(Over) Collection (C-D)	Interest Income (Expense)	Total True-Up Adjustment (E + F)
2		Marcy New Scotland 345 kV Upgrade Project (Segment A)	77,219,744	72,968,585	4,251,159	625,285	4,876,444

Attachment 6a - Accumulated Deferred Income Taxes (ADIT) Proration and Averaging Worksheet
Projected Annual Transmission Revenue Requirement
For the 12 months ended 12/31/2027

Line No.	ADIT Account	Amount	
1	190	702,651	From line 25
2	281 (enter negative)	-	From line 58
3	282 (enter negative)	(29,772,562)	From line 91
4	283 (enter negative)	(13,759)	From line 124
5	Total Projected ADIT	(29,083,670)	Enter as negative Appendix A, page 2, line 27

6	Rate year =	2027
7	Test period days after rates become effective	365

8 **Note 1** - The computations on this workpaper average the projected annual activity of accumulated deferred income taxes. To the extent that the ADIT is subject to the normalization requirements, the proration rules of Treasury Regulation Sec. 1.167(l)-1(h)(6) and the consistency rules of IRC Section 168(i)(9)(B) are applied. Activity related to the portions of the account balances not subject to the proration requirement are averaged instead of prorated.

9 **Note 2** - The components of the accumulated deferred income tax balances are detailed on Attachment 6b.

10	**Account 190 - Accumulated Deferred Income Taxes**		Amount debit / <credit>

Attachment 6c - Accumulated Deferred Income Taxes (ADIT) Proration and Averaging Worksheet
Actual Annual Transmission Revenue Requirement (True-up Adjustment)
For the 12 months ended 12/31/2027

Line No.	ADIT Account	Amount	
1	190	-	From line 25
2	281 (enter negative)	-	From line 58
3	282 (enter negative)	-	From line 91
4	283 (enter negative)	-	From line 124
5	Total Projected ADIT	-	Enter as negative Appendix A, page 2, line 27

6	Rate year =	2027
7	Test period days after rates become effective	365

8 **Note 1** - The computations on this workpaper average the actual annual activity of accumulated deferred income taxes. To the extent that the ADIT is subject to the normalization requirements, the proration rules of Treasury Regulation Sec. 1.167(l)-1(h)(6) and the consistency rules of IRC Section 168(i)(9)(B) are applied. Activity related to the portions of the account balances not subject to the proration requirement are averaged instead of prorated.

9 **Note 2** - The components of the accumulated deferred income tax balances are detailed on Attachment 6d.

				Amount debit / <credit>
10	**Account 190 - Accumulated Deferred Income Taxes**			
11	Beginning Balance	FF1 234.8.b		-
12	Less: Portion not related to transmission			-
13	Less: Portion not reflected in rate base			-
14	Subtotal: Portion reflected in rate base	Line 11 - line 12 - line 13		-
15	Less: Portion subject to proration	Line 29, Col. D		-
16	Portion subject to averaging	Line 14 - line 15		-
17	Ending Balance	FF1 234.8.c		-
18	Less: Portion not related to transmission			-
19	Less: Portion not reflected in rate base			-
20	Subtotal: Portion reflected in rate base	Line 17 - line 18 - line 19		-
21	Less: Portion subject to proration (before proration)	Line 41 Col. D		-
22	Portion subject to averaging (before averaging)	Line 20 - line 21		-
23	Ending balance of portion subject to proration (prorated)	Line 41 Col. H		-
24	Average balance of portion subject to averaging	(Line 16 + line 22) / 2		-
25	Amount reflected in rate base	Line 23 + line 24		- Enter on line 1

26 **Note 3** - Accumulated deferred income tax activity in account 190 subject to the proration rules relates to taxable contributions in aid of construction, net operating loss carryforwards, regulatory liabilities for excess deferred income taxes and any other amounts subject to the Section 168 or other normalization requirements.

27 **Account 190 - Accumulated Deferred Income Taxes**

140	December	-	-	-	1	365	-	-	-	-	-	-	-	-
141	Total		-						-	-				

142 **Note 7** - Column J is the difference between actual monthly and projected monthly activity (Column I minus Column C). Specifically, if projected and actual activity are both positive, a negative in Column J represents over-projection (i.e., the amount of projected activity that did not occur) and a positive in Column J represents under-projection (i.e., the excess of actual activity over projected activity). If projected and actual activity are both negative, a negative in Column J represents under-projection (i.e., the excess of actual activity over projected activity) and a positive in Column J represents over-projection (i.e., the amount of projected activity that did not occur).

143 **Note 8** - Column K preserves the effects of ADIT proration from the projected revenue requirement when actual monthly and projected monthly activity are either both increases or decreases. Specifically, if Column J indicates that ADIT activity was over-projected, enter Column G x [Column I / Column C]. If Column J indicates that ADIT activity was under-projected, enter the amount from Column G and complete Column L). In other situations, enter

144 **Note 9** - Column L applies when (1) Column J indicates that ADIT activity was under-projected AND (2) actual monthly and projected monthly activity are either both increases or both decreases. Enter 50 percent of the amount from Column J. In other situations, enter zero. The ADIT activity in column L is multiplied by 50 percent to reflect averaging of rate base to the extent that the proration requirement has not been applied to a portion of the monthly ADIT activity.

145 **Note 10** - Column M applies when (1) projected monthly activity was an increase while actual monthly activity was a decrease OR (2) projected monthly activity was a decrease while actual monthly activity was an increase. Enter 50 percent of the amount of actual monthly activity (Col I). In other situations, enter zero. The ADIT activity in column M is multiplied by 50 percent to reflect averaging of rate base to the extent that the proration requirement has not been applied to a portion of the monthly ADIT activity.

146 **Note 11** - Column N is computed by adding the prorated monthly ADIT activity, if any, from Column K to the portion of monthly ADIT activity, if any, from Column L or M to the balance at the end of the prior month.

17	302	Franchises and Consents	1.85%
18	303	Miscellaneous Intangible Plant / Computer Software	6.67%
19	303.1	Contributions in Aid of Construction	Note B

Notes

A These depreciation rates shall stay in effect until changed pursuant to a Commission order emanating from an FPA Section 205 or Section 206 filing.

B In the event a Contribution in Aid of Construction (CIAC) is made for a transmission facility, the transmission depreciation rates above will be weighted based on the relative amount of underlying plant booked to the accounts shown in lines 1-9 above and the weighted average depreciation rate will be used to amortize the CIAC. The life of a facility subject to a CIAC will be equivalent to the depreciation rate calculated above, i.e., 100% ÷ deprecation rate = life in years. The estimated life of the facility or rights associated with the facility will not change over the life of a CIAC without prior FERC approval.

LS Power Grid New York Corporation I
Worksheet - Annual Excess or Deficient Accumulated Deferred Income Taxes Worksheet
Annual Transmission Revenue Requirement
For the 12 months ended 12/31/2027

Line No.

1 **Purpose of worksheet**

The purposes of this portion of the worksheet are to:
- describe legislation resulting in remeasurement of ADIT accounts,
- explain how any ADIT accounts were re-measured,
- explain the excess or deficient ADIT contained therein,
- explain the accounting for any excess or deficient amounts in Accounts 182.3 (Other Regulatory Assets) and 254 (Other Regulatory Liabilities),
- reconcile the amounts of excess or deficient ADIT determined as a result of each specific change in tax law (i.e., unrecovered regulatory assets and unrefunded regulatory liabilities comprising the Rate Base Adjustment Mechanism) as of the beginning and end of the current test period,
- indicate whether each excess or deficient ADIT amount is protected (i.e., subject to the normalization rules) or unprotected (i.e., not subject to the normalization rules),
- indicate the amount of amortization of the excess or deficient ADIT returned or recovered through rates (i.e., the Income Tax Allowance Adjustment Mechanism) during the current period,
- indicate the accounts to which the excess or deficient ADIT are amortized,
- indicate the amortization period of the excess or deficient ADIT being returned or recovered through rates, and

2 - describe the method of amortization each excess or deficient ADIT amount.

3 **Description of changes in tax law**

4 **Note 1a** - The composite tax rates used for the remeasurement of ADIT balances are:

5

6		Historical	New
7	Federal income tax rate	21%	21%
8	State income tax rate	7%	7%
9	Composite federal/state income tax rate	26.73%	26.14%
10	Tax gross-up factor	1.36477	1.35382

Note 1b - A New York State (NYS) tax law change enacted on April 19, 2021, increased the income tax rate from 6.5% to 7.25% for taxpayers with business income base exceeding $5 million. The tax rate was effective for tax years beginning on or after January 1, 2021, and before January 1, 2024. This tax law change was expected to affect LS Power Grid New York Corporation I for 2023. The 2023 projected revenue requirement was based on the 7.25% tax rate. However, actual taxable income for 2023 did not exceed $5 million and, as such, the 6.5% tax rate applied to the 2023 tax year. The actual revenue requirement (true-up) for 2023 was based on the 6.5% tax rate.

In May 2023, NYS enacted a law that extended the increased corporate franchise tax rate of 7.25% for a three-year period, through tax year 2026, for taxpayers with taxable income greater than $5 million (versus a tax rate is 6.5% for other taxpayers).

The tax provision in the 2024 formula rate templates was based on a 26.14% composite tax rate (i.e., reflecting the 7.25% NYS rate). Actual taxable income for 2024 exceeded $5 million and, accordingly, the 7.25% NYS rate applied to tax year 2024. The temporary differences resulting in 2024 deferred tax expense are expected to reverse in tax years in which a 6.5% tax rate is expected to apply. The template is not designed to use different tax rates to compute current tax expense and deferred expense for the same tax year. As a result, deferred tax expense was recovered at an amount that is higher than the amount estimated for the deferred tax liability (based on the expected reversal dates of the temporary differences and the tax rates expected to apply in such years). A regulatory liability resulting from the application of a 7.25% in computing recoverable income tax based on the equity return and the expectation of the 6.5% tax rate applying to temporary differences originating in 2024 was computed and has been reflected in the 2026 projected revenue requirement. The regulatory liability was amortized over a one-year period (i.e., 2026). Neither the amortization nor the regulatory liability affects the 2027 revenue requirement.

The 2025 projected revenue requirement was based on the 6.5% tax rate. This tax rate applied for 2025 tax reporting. Thus, the tax rate applied to temporary differences originating in 2025 is the same tax rate expected to apply when the temporary differences reverse, and no regulatory asset or liability resulted.

In May 2026, NYS enacted a law that extended the increased corporate franchise rate of 7.25% for an additional three years (i.e., through tax year 2029). The 7.25% NYS tax rate is expected to apply in 2027 and, thus, is reflected in the 2027 Projection. As stated above, the template is not designed to use different tax rates to compute current tax expense and deferred expense for the same tax year. As a result, deferred tax expense will be recovered at an amount that is higher than the amount estimated for settlement of the deferred tax liability (based on the expected reversal dates of the temporary differences and the tax rates expected to apply in such years). A regulatory liability resulting from the application of a 7.25% in computing recoverable income tax based on the equity return and the expectation of the 6.5% tax rate applying to temporary differences originating in 2027 is computed on this worksheet and reflected in rate base.

Note that LS Power Grid New York Corporation I began operations in 2020. Book/tax differences resulting in ADIT did not exist until 2020. Thus, the decrease in federal income tax rate enacted as part of the Tax Cuts and Jobs Act (TCJA) in 2017 did not affect LS Power Grid New York Corporation I and did not cause remeasurement of ADIT balances or recording refundable excess ADIT amounts or recoverable deficient ADIT amounts as Account 254 regulatory liabilities or Account 182.3 regulatory assets, respectively. Accordingly, there is no TCJA information reported below.

11

Summary of re-measurement of ADIT resulting from the 2017 decrease in federal income tax rate

	(a)	(b)	(c)	(d)	(e)	(f)	(g)	(h)	(i)	(j)

Note 2 - Explanation of how ADIT accounts are re-measured upon a change in income tax law

23 Deferred tax assets and liabilities are adjusted (re-measured) for the effect of the changes in tax law (including tax rates) in the period that the change is enacted. Adjustments are recorded in the appropriate deferred tax balance sheet accounts (Accounts 190, 281, 282 and 283) based on the nature of the temporary difference and the related classification requirements of the accounts. If as a result of action or expected action by a regulator, it is probable that the future increase or decrease in taxes payable due to the change in tax law or rates will be recovered from or returned to customers through future rates, a regulatory asset or liability is recognized in Account 182.3 (Other Regulatory Assets), or Account 254 (Other Regulatory Liabilities), as appropriate, for that probable future revenue or reduction in future revenue. Re-measurements of deferred tax balance sheet accounts may also result in re-measurements of tax-related regulatory assets or liabilities that had been recorded prior to the change in tax law. If is not probable that the future increase or decrease in taxes payable due to the change in tax law or rates will be recovered from or returned to customers through future rates, tax expense is recognized in Account 410.2 (Provision for Deferred Income Taxes, Other Income or Deductions) or tax benefit is recognized in Account 411.2 (Provision for Deferred Income Taxes-Credit, Other Income or Deductions), as appropriate.

Rate Base Adjustment Mechanism - Summary

Notes:

1 During the 2026 Rate Year, LSPGNYexpects to place in service certain software assets that are capitalized upon commencement of the applicable software agreements, while the related contractual payments are made over time. Accordingly, the Company's books and records will reflect the full capitalized cost of the software assets in plant in service, together with a corresponding unpaid liability for the portion of the cost not yet paid.

2 Represents the unpaid liability portion of the software assets based on the expected payment schedules under the applicable software agreements.

LS Power Grid New York Corporation I
Workpaper for Permanent Book/Tax Differences
2027 Projection

The book/tax differences reflected in recoverable income tax expense are differences between revenues and expenses reflected in the revenue requirement and revenue and deductions reflected in taxable income. As such, non-operating (below-the-line) expenses and income are not included (e.g., accrual of AFUDC-equity). Book depreciation of capitalized AFUDC-equity is reflected in ratemaking, but not for income tax purposes, and, thus, is a permanent book/tax difference in this context. Similarly, amortization of the regulatory asset for pre-commercial carrying charges accrued at an after-tax equity rate of return is permanent difference between recoverable expenses and tax deductions.

	Permanent differences per tax return	**Amount per Formula Rate Template**	
1	Depreciation of AFUDC-equity	517,479	
2	Amortization of carrying charge-equity	70,052	
3	Total permanent book/tax differences	587,530	
4	Tax rate	26.73%	Appendix A, Page 3, Line 65, Column (3)
5	Tax effect of permanent book/tax differences	**157,032**	**→ To Attachment 3, Line 207**
6	Tax gross-up factor	1.3648	= 1 / (1-tax rate)
7	Permanent Differences Tax Adjustment	214,313	= Line 5 / Line7
