Historic Structure

Hydrologic Features

Rivers/Streams

Waterbodies

Wetlands

Floodplain

Rare, Threatened, & Endangered Resources

Animal Assemblage

Invertebrate Animal

Vertebrate Animal

Vascular Plant

High Quality Natural Communities

Notes

1) The routes displayed represent two alternative options. **One** route will be chosen for construction and the final alignment may vary from those illustrated here as stakeholder feedback is gathered and incorporated.

2) Some legend symbols may differ in size for easier identification.

3) This map depicts the major environmental constraints considered during routing analysis.
